QUANTITY SURVEYING CONTRACTS AND TENDERS (2019 Pattern) (Semester-VIII) (401012)

Time: 3 Hours 1 IMax. Marks: 70

Instructions to the candidates:

- All questions are compulsory.
- *3*) Figures to the right indicate full marks.
- *3*) Assume Suitable data in wherver required.
- Fig. 1.a shows plan and section of residential building. Determine the *Q1*) a) quantities of following item By PWD Method or Center line Method (Assume any suitable data) [10]
 - **Excavation** in foundation
 - PCC in Foundation
 - UCR Masonry in CM (1:6) in foundation iii)
 - CR Masonry in CM (1:6) in foundation
 - Damp proof Course
 - Explain Different methods of taking out quantities. & Which factors to b) be considered during preparation of Detailed Estimate.

- **Q2**) a) AR.C.C. Simply supported beam of 300 mm X 650mm is reinforced with 4 number of 20 mm diameter bars. The main bars are placed in one row and two bar bent up out of 4. Two top anchor bar of 12 mm diameter are provided and stirrups of 6 mm diameter are provided at 140 mm c/c span over beam of length 5.6m. End beraing is 30 cm. Calculate cher 2011 Quantity of Straight bar, Bent up bar Bar, Anchor Bar, & Stirrups Ref. Fig 2-a [10]
 - Explain the terms b)

[8]

- i) Bar Bending Schedule
- Types of Steel reinforcement ii)
- Weight of Steel Bar iii)
- Number of Bars or Stirrups iv)

P.T.O.

Q 3)	a)	Calc	culate	the qua	antities (of Earth	work i	s cuttir	ng and fi	lling for	road with
		follo	wing	data		,					[10]
		i)	Forn	nation	width of	road is	12m				
		ii)	Slop	e in cu	tting 1.5	:1,					
		iii)	Slop	e in Ba	nking 2:	1/2					
		Cha	inage	0.4	30	60	90	120			
		GL i	in m	500	498,50	60.70	497	494			
		FL i	n m	497	496.50	496	495.5	495			
	b)	List	out di	fferent	method	ls to wo	rkout E	arth w	ork quar	tily for	road work.
		Exp	Iain a	ny one	method	•			d	V-	[8]
			0.			OF	2				
Q4)	a)	Calc	ulate	the qua	antities	of Earth	work i	s cuttir	ng and fi	lling for	road with
		folio	wind	data					,		[10]
		i)	Forn	nation	width of	road is	10m	Ø.,			
	ii) Formation level of starting chainage is 50.40 m										
	iii) Side slope is 1:2 for filling and 1:1.5 in cutting						utting				
iv) The road surface shall be given falling gradient of							adient o	f 1:100			
		Cha	inage	0	30	600	90	120	150	180	
		GL		50.70	50.60	60.60	51.10	51.20	51.00	50.00	, v
					^	6.					
	b)	Diff	erenti	ate bet	weenfol	lowing	method	ls			[8]
		i)	Mid	section	nal area	method	& Mea	an Sect	ional are	ea metho	od.
		ii)	Trap	ezoida	l formul	a metho	od & Pr	ismoid	lal form	ila meth	od.
										3	
Q 5)	a)	What is the necessity of drafting specification for Civil engineering we								ring work?	
		Exp	lain br	iefly					S S		[9]
		i)	Gene	eral spe	ecificatio	on		A)	0)		
		ii)	Deta	iled sp	ecification	on		\mathcal{O}'	30		
	b)	Prep	are a	rate an	alysis of	f 12mm	thick c	ement	plaster ((1:4)	[8]
						OF	3	8.V			
								×			

[6181]-87

Q6)	a)	Prepare a detailed Specification for plain cement concrete & Bric	k
		Masonry in Superstructure. [9]
	b)	What are the factors affecting rate analysis. Explain in details th	e
		procedure for rate analysis. [8	3]
Q 7)	a)	What are the different types of value? Explain market value and any	5
		factor affecting market value of property. [6	[]
	b)	Explain with example five purpose of valuation. [5]	[]
	c)	Determine the present value of a building including land using following	g
		data: [6	
		i) Income available from property: 9600 Rs/ per annum.	
		ii) Life of property: 80 years	
		iii) The rate for redemption is 6% and rate of interest on government	ıt
		securities is 5%.	
		iv) All outgoing: 35% of gross income.	
	\	v) Present cost of land: Rs. 30 lakhs.	
		OR ,	
Q 8)	a)	Explain [6	[]
		i) Salvage value	
		ii) Book value	
		iii) Fair market value	
			Ś
	b)	State four methods of depreciation Explain any one detail. [5]	
	c)	The depreciated replacement value of building has to be found out with	h
		the following data [6	[]
		i) Total builtup area = 500 m ²	
		ii) Age of building = 25 years	
		iii) Life of building = 90 years	
		iv) Scrap value after useful life = 10%	
		v) Percentage for sinking fund = 5%	
		A 2000/ (2°	
		Assume rate of construction as Rs. 2000/sq-m
